PROFESSIONAL SUMMARY

Full-Stack Software Engineer with experience building scalable fintech and web applications across frontend and backend systems. Skilled in Next.js, React, Vue.js, Node.js, Fastify, NestJS, TypeScript, PostgreSQL, Prisma, Redis, Docker, and event-driven architectures. Built payment reconciliation systems, REST APIs, background job workers, and real-time financial workflows. Passionate about high-performance products, clean architecture, and shipping reliable software in fast-moving startup environments.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C, PHP

Frontend: React.js, Next.js, Vue.js, TailwindCSS

Backend: Node.js, Fastify, NestJS, Express.js

Databases: PostgreSQL, MySQL, MongoDB

ORM / Data: Prisma

Caching & Queues: Redis, BullMQ

DevOps & Infrastructure: Docker, Git, GitHub Actions, CI/CD, Vercel

Architecture: REST APIs, Webhooks, JWT Authentication, Event-Driven Systems, Background Workers, Microservice-Oriented Design

Testing: Unit Testing, API Testing, Exploratory Testing

EDUCATION

Federal University of Technology, Minna – B.Tech Information Technology 2022 – 2026

CGPA: 4.71 / 5.00 Awarded for Outstanding Academic Excellence

EXPERIENCE

Freelance Full-Stack Developer – Fiverr (Remote)

2024 – Present

Designed and delivered production-ready web applications and backend services for international clients across SaaS, e-commerce, and fintech-related projects.

Key Contributions:

- Built responsive applications with Next.js, React, Vue.js, and TailwindCSS.
- Developed Node.js/Fastify/NestJS backend services and REST APIs.
- Integrated third-party payment and business APIs.
- Implemented authentication, database models, and API validation.
- Containerized applications with Docker and managed deployment workflows.
- Collaborated directly with clients, handled feature planning, debugging, and iterative product delivery.

Timart Business Solution — Quality Assurance Tester

Testing | QA | Desktop & Mobile

Tested and validated web, desktop, and mobile applications. Collaborated with developers to identify bugs, improve UI/UX, and ensure seamless performance.

Forbes Royal School — Technology Coach

Education | Instructional Design

Taught grade school students both practical and theoretical technology concepts, fostering early digital literacy through interactive learning sessions.

Client Onboarding Platform — Frontend Developer

SaaS | Data Migration | Tech B2B

Built a web application that streamlined client onboarding and supported complex data migrations for tech companies.

SELECTED PROJECT

PayLedger — Financial Operations & Payment Reconciliation Platform

Next.js • Fastify • TypeScript • Prisma • PostgreSQL • Redis • BullMQ • Docker

Built a fintech platform that converts bank transfer events into structured business records and automates payment reconciliation.

Highlights:

- Designed a ledger-based payment architecture with immutable transaction records.
- Built REST APIs for invoices, customers, payments, and financial reporting.
- Implemented Redis + BullMQ background workers for asynchronous reconciliation and virtual account processing.
- Integrated payment webhooks and automated invoice allocation workflows.
- Optimized backend performance through caching, queue processing, and database indexing strategies.
- Containerized services with Docker and structured the application using modular service boundaries.

CERTIFICATIONS

- ALX Software Engineering Certificate
- Google Web Development Certificate (Angular)
- Introduction to Generative AI – AWS
- Blockchain Basics – Cyfrin Academy

STRENGTH

- End-to-end product ownership
- API and backend system design
- Performance optimization
- Event-driven architecture
- Problem solving and debugging
- Startup execution speed
- Cross-functional collaboration
